

HM1 CONCENTRATE

NON TOXIC PROTECTOR FOR THE WOOD AGAINST INSECTS AND FUNGI MADE WITH A PROCEDURE WITH WORLD WIDE PATENT

INNOVATIVE ADVANCED ACTIVE PRINCIPLE:

HM1 is produced on the basis of mineral and regrowing resources. The nutrients that the insects are searching for are eliminated until penetration depth. At the same time the treated wood is made unrecognizable for the parasites as their source of food.

AREAS OF APPLICATION:

Nontoxic product to protect all wood class against insects and fungi. It's adapted to use in interiors without coatings and exteriors with coating in the form of natural protective products against water. It does not chip and the application can, if necessary, be repeated without polishing. HM1 let the wood breathe and allows the aqueous vapour diffusion. It protects against rays UV and comes up that the wood is put grayish or white. It fortifies old or damaged wood. It reduces the fire danger. Cleaner for wood, protected with HM1.

COMPOSICIÓN AND ACTIVE COMPONENTS:

aluminium oxide, calcic oxide, acid of fruits, palmitate of potassium, earth of silica, silica acid, vegetal colourings, oxide of magnesium, sodium carbonate, sodium chloride, vegetal fats and oils, vegetal extracts and water.

CONTAINER SIZES:

1l, 5l o 10l

CONSUMTION:

Each liter of the concentrate = 10 liters of the finished product and sufficient to protect 50m² of wood.

LOT AND DATE OF MANUFACTURE

See package.

DURABILITY:

Limitless. It is not necessary to protect it of extreme temperatures. In order to store the product, close the package well to avoid that it is dried.

ADVICE OF PRUDENCE IN THE APPLICATION:

None.

RISK ADVICE:

HM1 does not contain toxic substances and is free of injurious emissions for the health, and can even be applied in closed rooms. HM1 is 100% biodegradable. It contaminates the atmosphere neither with his application nor with its elimination. Its possible to be used in the surroundings of allergic, ill and children. Its possible to be used in animal stays (even bees). Don't ingest. Store outside the reach of the children. In case of contact with the eyes and the skin, wash immediately and abundantly with water.

DOSE AND APPLICATION MODE:

The product is commercialized in the form of concentrate. Before applying, mix and to dilute the content of the package or parts of the content with 9 equal parts of water. The application of HM1 is with brush or pistol. Minimum amount: 200 ml m² of the product diluted with water. Protect treated surfaces against (pluvial) waters.

Protection against insects, fungi, fires and ultraviolet rays:

Apply the product, diluted with 9 volumes of water. After drying repeat the process.

To fortify old wood: Apply the product, diluted with 9 volumes of water, let dry and repeat the process several times.

TERM OF SECURITY:

Limitless.

APTITUDE:

All kind of wood without changes of color (even in wood that changes to the color by getting in contact with water, like chestnut tree and Douglas). Apt for the restoration of old furniture without changing its aspect.

ASPECT:

Transparent, satin-mat.
It heightens the veining.
